# IPC-7351B Land Pattern Naming Convention Notes

- All dimensions are in Metric Units
- All Lead Span and Height numbers go two places past the decimal point and “include” trailing Zeros
- All Lead Span and Body Sizes go two place before the decimal point and “remove” leading Zeros
- All Chip Component Body Sizes are one place to each side of the decimal point
- Pitch Values are two places to the right & left of decimal point with no leading Zeros but include trailing zeros

## Naming Convention Special Character Use for Land Patterns

The \_ (underscore) is the separator between pin Qty in Hidden & Deleted pin components

The – (dash) is used to separate the pin qty.

The X (capital letter X) is used instead of the word “by” to separate two numbers such as height X width like “Quad Packages”.

## IPC-7351B Suffix Naming Convention for Land Patterns

**Common SMT Land Pattern to Describe Environment Use** (This is the last character in every name)

Note: This excludes the BGA component family as they only come in the Nominal Environment Condition

- **M**..... Most Material Condition (Level A)
- **N**..... Nominal Material Condition (Level B)
- **L**..... Least Material Condition (Level C)

### Alternate Components that do not follow the JEDEC, EIA or IEC Standard

- **A**..... Alternate Component (used primarily for SOP & QFP when Component Tolerance or Height is different)
- **B**..... Second Alternate Component

### Reverse Pin Order

- **-20RN**..... 20 pin part, Reverse Pin Order, Nominal Environment

### Hidden Pins

- **-20\_24N** ..... 20 pin part in a 24 pin package. The pins are numbered 1 – 24 the hidden pins are skipped. The schematic symbol displays up to 24 pins.

### Deleted Pins

- **-24\_20N** ..... 20 pin part in a 24 pin package. The pins are numbered 1 – 20. The schematic symbol displays 20 pins.

### JEDEC and EIA Standard parts that have several alternate packages

- **AA, AB, AC**. JEDEC or EIA Component Identifier

### GENERAL SUFFIXES

**\_HS**.....**HS = Land Pattern with Heat Sink attachment requiring additional holes or pads**

Example: TO254P1055X160\_HS-6N

**\_BEC** .....**BEC = Base, Emitter and Collector (Pin assignments used for three pin Transistors)**

Example: SOT95P280X160\_BEC-3N

**\_SGD** .....**SGD = Source, Gate and Drain (Pin assignments used for three pin Transistors)**

Example: SOT95P280X160\_SGD-3N

**\_213**.....**213 = Alternate pin assignments used for three pin Transistors**

Example: SOT95P280X160\_213-3N
